Supplement I

CHANGES IN FARM PRODUCTION AND EFFICIENCY

1955 SUMMARY

SUPPLEMENT I

LIBRARY
RECORD
AUG 24 1956
U. S. DEPARTMENT OF AGRICULTURE

Index numbers of farm production, by groups of livestock and crops for each geographic division, 1919-55

UNITED STATES DEPARTMENT OF AGRICULTURE
Agricultural Research Service
Washington, D. C.
June 1956

The purpose of this supplement is to provide additional data on changes in farm production in each geographic division. The desirability of limiting the size of the main publication prevented their inclusion in it. Yet, many people are interested in the trends in farm production in different parts of the country.

Two additional supplements are available.

Supplement II contains nine regional tables of index numbers of man-hours of farm labor used for each of the groups of livestock and crops shown in table 12 in the main publication.

Supplement III contains nine regional tables of index numbers of farm production per man-hour for each of the groups of livestock and crops shown in table 14 in the main publication.
